

Readme File

For “Pricing Regulation and Imperfect Competition on the Massachusetts Health Insurance Exchange” by Keith M. Marzilli Ericson and Amanda Starc

Data

- **enroll.dta:** (*Proprietary, Confidential Data*) Transaction-level data from the Massachusetts Connector Authority, for the Commonwealth Choice program, November and December 2009. This file may be applied for at <https://www.mahealthconnector.org>
- We have made available premium quotes downloaded from the Massachusetts Connector website, mahealthconnector.org
 - **premiumQuotesNovDec2009.dta**
 - **detailedQuotesNov.dta**
 - **detailedQuotesDec.dta**
- There are two additional files we constructed:
 - **Figure2CostsAndAlpha.dta**, which contains costs from the MEPS as described in Table3
 - **geoRegionZipcode.dta**, which links zipcodes into more aggregated geographic regions

Analysis Files

Stata analysis were run using Stata (MP) versions 12 and 13. Matlab analysis were run using R2012a and utilized KNITRO for Matlab.

Analysis Files should be run in the following order:

In Stata

1. PrepareFiles1.do
 2. PrepareFiles2.do
 3. Table1.do (Creates results for Table 1)
 4. Table2.do (Creates results for Table 2)
 5. Figure1.do (Creates Figure 1)
 6. Figure2.do (Creates Figure 2)
- Then, in Matlab:
7. Tables4and5.m (Creates results for Tables 4 and 5)

Table 3 can be constructed from the Medical Expenditure Panel Survey (MEPS) as follows:

- At <http://meps.ahrq.gov/>, choose Summary Data Tables, Household Component Summary Tables
- Use Year 2008, Table 1 (Total Health Services-Median and Mean Expenses per Person With Expense and Distribution of Expenses by Source of Payment: United States, 2008)
- Customize table:

- Person Records Used: Age in years=27-64 AND Health insurance status='<65, Any private' AND Poverty status='Middle income' or 'High income'
- Population: Age in years=27-64, Health insurance status='<65, Any private', and Poverty status='Middle income' or 'High income'
- Age categories: 27-29, 30-34, 35-39, 40-44, 45-49, 50-54, and 55-64

Data Dictionary

enroll.dta (as provided to us by Connector Authority)

- member_no a member-specific unique id
- gender of the member, M or F
- age of the member, in years
- plan contains tier of plan: “BRONZE”, “YAP”, etc. (we would have named this variable tier)
- carrier the name of the insurance firm the plan is offered by. E.g. “BCBS”.
- eff_date effective date of transaction
- carrier_plan_name the name of the insurance plan. E.g. “Advantage HMO Select 750”
- rx Y or N, whether the plan had prescription drug coverage.
- annv_date member’s anniversary date for coverage (1st of the month)
- m_city city of member
- m_zip zipcode of member
- m_state state of member
- dep_count number of individuals covered on plan (1 to 10)
- add_type = “N” for new business
- add_reason why the member was added to the plan (e.g. “05-New Business” v. “02-Renewal” or “06-COBRA”)
- mo_prem member’s monthly premium for this plan

premiumQuotesNovDec2009.dta

zipcode	zipcode for which the quote was for
age_self	age of the member
age_spouse	age of the member’s spouse (if applicable)
familysize	=1, the number of people covered by the plan
insurername	Name of the insurer offering the plan
